ADHARSH S

MERN STACK DEVELOPER

+91 8891580990 | adharshkattaikonam@gmail.com | Linkedin | GitHub | LeetCode

PROFILE SUMMARY

Full Stack Developer with a strong foundation in analytical thinking and communication, and hands-on experience building scalable web applications using modern JavaScript technologies. Skilled in designing clean backend architectures, developing responsive frontends, and integrating third-party APIs. Possesses a solid understanding of system design fundamentals and the full project lifecycle. Passionate about building production-ready applications with maintainable architecture and performance-focused design.

SKILLS

Programming Languages:	JavaScript (ES6+), TypeScript
Frontend:	React.js, Next.js, Tailwind CSS, HTML5, CSS3, Redux Toolkit, React Router
Backend:	Node.js, Express.js, REST APIs, JWT, Socket.IO, WebRTC
Databases:	MongoDB, PostgreSQL, Firebase
AI Technologies:	LLMs, RAG, Vector Databases, Embeddings, Semantic Search
Cloud & Tools:	AWS (EC2, S3), Git, GitHub, Vercel, Postman, VS Code, Figma, pnpm, Docker
Concepts:	Data Structures & Algorithms, Object-Oriented Programming (OOP)
Architecture:	Clean Architecture**,** Event-Driven Architecture, Repository Pattern

PROJECTS

Nest & Nail – Service Marketplace Platform

Live *GitHub*

A **full-stack home-service marketplace** connecting clients with **verified professionals**, **featuring location-based discovery**, scheduling, **real-time communication**, **video meetings, payments, and worker verification**.

- Tech stack: Next.js, React, TypeScript, Node.js, Express, MongoDB, AWS S3, Socket.IO, Razorpay, Zustand, TailwindCSS, Nginx, PM2, Certbot.
- Architected backend using **Clean Architecture, SOLID**, **Dependency Injection, DTOs, and Mappers.**
- Implemented **JWT** authentication, **HttpOnly Cookies**, OTP verification, **Google OAuth**, password reset, and **RBAC**.
- Built **geospatial worker discovery**, availability, **slot scheduling, date blocking**, and booking validation.
- Developed **real-time chat** using **Socket.IO** and video meetings using **WebRTC**, with secure rooms and time tracking.
- Integrated **Razorpay payments** and wallet transactions with signature verification.
- Built **worker verification**, **document uploads**, service management, reviews, concerns, and **real-time notifications**.
- Deployed using **AWS EC2, S3, Nginx, PM2, Certbot SSL, and Vercel.**

Vintage Fashion – E-commerce Website

Live *GitHub*

A **full-stack fashion e-commerce platform** supporting product discovery, secure payments, order management, and admin operations.

- Tech stack**:** React, Node.js, Express, MongoDB, JWT, Razorpay, Cloudinary, Socket.IO, Nodemailer, Google OAuth
- Architected **using MVC**, implementing **JWT + OTP authentication, Google OAuth, RBAC**, and secure user management.
- Developed **product CRUD,** search**,** pagination**,** filtering**, cart, inventory,** reviews**, coupons, and** promotional **offers**.
- Integrated **Razorpay payments**, order tracking, **cancellation**, and **wallet-based refund workflows**, with payment verification.
- Built an **admin dashboard** for users, products, orders, inventory, and coupons, with **sales analytics**, **Cloudinary** image management, and **Socket.IO real-time chat**.

MINI PROJECTS

Adukkala – Full-Stack Recipe Application *Live* *GitHub*

- Full-Stack Engineering: Designed and developed **a recipe platform** using Next.js, React, Express.js, TypeScript, PostgreSQL, **Prisma**, and Tailwind CSS with secure JWT authentication and **responsive UI.**
- Scalable API Development**:** Implemented REST APIs, third-party API integration, database modeling, and user-centric features including favorites, search, and personalized recipe preferences.

LensCard – Aadhaar OCR Application *Live* *GitHub*

- OCR & Full-Stack Development: Built **an Aadhaar OCR application** using React, TypeScript, Express.js, and Tailwind CSS, enabling users to securely upload Aadhaar card images and **automatically extract structured information** through an intuitive interface.
- Backend Architecture & Image Processing: Designed **a Clean Architecture backend** with **dependency injection**, **Sharp-based image preprocessing, Tesseract OCR integration,** and **regex-driven parsing** to accurately extract Aadhaar details while validating uploads and **processing images** entirely in memory without persistent storage.

EDUCATION

Professional Training– Full Stack Development (MERN Stack)- Brototype **2024 – 2026**

- *Built and deployed multiple production-grade applications, including marketplace and service platforms.*
- *Developed responsive frontends using React.js, TypeScript, Next.js, and modern frontend frameworks.*
- *Designed scalable backend systems using Node.js, Express.js, and TypeScript.*
- *Implemented real-time features, authentication systems, payment integrations, and third-party APIs.*
- *Applied Clean Architecture principles and scalable system design concepts in hands-on projects.*
- *Strengthened skills in debugging, performance optimization, maintainable code, and professional communication.*

Trivandrum, Kerala

Master of Arts (M.A.) in English Language and Literature **2022 –2024**

- *AJ College of Science and Technology - Kerala University,* *Trivandrum, Kerala*

Bachelor of Arts (B.A.) in English Communicative **2019 – 2022**

- *AJ College of Science and Technology - Kerala University* *Trivandrum, Kerala*
